

Case-loads reported by BAETS members, 2014

Figures represent the number of cases of each operation type reported to the national database by the named BAETS member, where date of operation is between 1st January and 31st December 2014. Data were extracted on 17th March 2016.

Hospital allocation is that registered with the database by the reporting surgeon. Surgeons may operate at more than one, or move between, hospitals.

The figures are intended to provide an estimate of each surgeon's annual case - load of endocrine operations. However, they may under-estimate this case-load if:

Not all operated cases have been entered into the national database
The surgeon's BAETS membership began or ended part way through the year
